## Summary

Computer Engineering graduate with expertise in full-stack web development using Node.js, Express, and MongoDB. Passionate about building scalable applications and contributing to innovative tech solutions while continuously learning and adapting to new technologies.

## Education

<b>Bachelors of Computer Engineering</b> Pokhara University, Pokhara	2019–2024
<b>School Leaving Certificate</b> SOS Hermann Gmeiner School Gandaki, Pokhara	2017–2019

## Coursework

- Data Structures and Algorithms – Database Management Systems – Advanced Web Technology
- Computer Networks – Software Engineering – Web Development

## Projects

### Nutrition Tracker 🔄

- Designed and developed a full-stack nutrition tracker using Node.js, Express, MongoDB, and JWT for secure user authentication.
- Integrated Nutritionix API for real-time nutritional data and created a recommendation system based on user dietary preferences and activity levels.

### foodBUDDY 🔄

- Built a dynamic food delivery web application using the MERN stack, enabling users to search, and order meals.
- Secured user accounts with JWT-based authentication and implemented a scalable backend to manage food catalogs, orders, and profiles.

### Library Management System 🔄

- Developed a Library Management System with CRUD functionality for book records and implemented role-based authentication for secure user access.
- Designed an intuitive interface and robust backend to support efficient book cataloging and streamline user interactions.

## Technical Skills

**Languages:** HTML, CSS, JavaScript

**Backend Development:** Node.js, Express.js

**Frontend Development:** React.js, Tailwind CSS

**Databases:** MongoDB, PostgreSQL

**Tools:** Git, GitHub, VS Code, Postman
